LinkedIn: linkedin.com/in/jeevanakarani | GitHub: github.com/JeevanaMohanKarani

EDUCATION

ICFAI Foundation for Higher Education, Hyderabad

2023 - Present (Expected: 2027)

Bachelor of Technology (B.Tech) in Data Science & Artificial Intelligence (DSAI) | **CGPA: 8.9 / 10**

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java/Python), DBMS (SQL), Operating Systems, System Design.

Rajiv Gandhi University of Knowledge Technologies (RGUKT), Kadapa - Pre-University Course (MPC)

83.9% | 2022 - 2023

P.V. Krishna Rao Memorial Kumar High School, Nuzvid - Secondary (Class X)

94.33% | 2021

TECHNICAL SKILLS

Languages: Python, Java, C, TypeScript, JavaScript, SQL, Dart, Kotlin, HTML, CSS

Frameworks & Web/Mobile: Next.js 16 (App Router), React 19, Flutter, Node.js, REST APIs, WebSockets, Firebase Cloud, Supabase

Data & Databases: SQL, SQL Server, Relational Schema Design, JSON/XML Data Structuring, ETL Pipelines

Core Competencies: Data Structures & Algorithms (DSA), Object-Oriented Design (OOP), System Architecture, CI/CD, Git

AI & Developer Tools: Claude, Antigravity, Model Context Protocol (MCP), PyTorch, TensorFlow, OpenCV, scikit-learn, VS Code, Cursor

PROFESSIONAL EXPERIENCE

SSC Helper (AIVA Freelancia) - Data and AI Developer

August 2026 - Present

- Digitized and built full-stack interactive educational reader modules across multiple subjects (Science, Maths, Telugu) utilizing Next.js 16 (App Router), TypeScript, and React 19.
- Structured, transformed, and validated raw curriculum datasets into standardized JSON data models, enabling dynamic state-driven chapter rendering.
- Engineered reusable interactive React components (dynamic calculation tables, figure notes, exercise lists) with optimized split layouts, reducing Cumulative Layout Shift (CLS) by 30%.
- Streamlined digital asset pipelines and image rendering workflows, cutting page load latency by 15% across mobile-first user environments.
- Maintained collaborative Git version control workflows on Dev branches, conducting code reviews and managing Vercel staging deployments.

SBAAcademy - Flutter & Data Developer Intern

July 2026 - Present

- Engineered cross-platform mobile educational applications using Flutter and Dart, developing interactive multi-grade learning modules (UKG to Grade 4).
- Constructed dynamic widget registries and grade navigation architectures, enabling modular UI rendering from centralized metadata models.
- Architected semester metadata schemas in JSON, synchronizing multi-media audio files, interactive exercise state, and visual assets.
- Debugged UI responsiveness, state management, and asset loading pipelines, ensuring smooth 60 FPS mobile execution across diverse devices.

Skillbanc - Full Stack Developer Intern

July 2026 - Present

- Developed interactive mobile and web applications using Flutter and Dart, ensuring UI consistency across client platforms.
- Automated digital asset processing and data transformation pipelines via Python scripting, reducing manual overhead by 40%.
- Implemented gamification features and analytics tracking, improving student platform retention by 25%.

Smart Homes Pvt Limited - Software & IoT Intern

June 2025 - July 2025

- Developed IoT automation solutions integrating embedded hardware (ESP32) with cloud backends, streaming real-time telemetry via Python and Firebase.
- Troubleshoot hardware-software communication bottlenecks, decreasing device connection drop rates by 15%.

TECHNICAL PROJECTS

Real-Time Student Eye-Tracking & Engagement Pipeline

Python, OpenCV, MediaPipe | April 2026

- Engineered a high-throughput computer vision pipeline using OpenCV and MediaPipe, processing 24 FPS video feeds with <5% spatial deviation.
- Integrated automated behavioral analytics and algorithmic focus-score computations to visualize real-time participant attention.

Automated Damage Detection & Classification System

Python, TensorFlow, Keras | Nov 2025

- Constructed an end-to-end deep learning CNN classification pipeline achieving 92% validation accuracy across multiple damage categories.
- Designed the backend REST inference interface to handle automated image upload validation and real-time inference delivery.

AquaSense Cloud - IoT Telemetry & Monitoring System

Kotlin, Android SDK, Firebase | 2025

- Architected an IoT water quality tracking system with automated alert mechanisms, integrating Kotlin Android UI with Firebase Realtime Database.

CERTIFICATIONS & ACHIEVEMENTS

- Anthropic: Completed coursework for Cloud Architect curriculum (Claude with Amazon Bedrock, MCP, API Integration, etc.).
- NASSCOM Gold Shield / Future Skills Prime: Certified in Exploratory Data Analysis, Data Processing, and Data Visualization.
- NPTEL: Business Intelligence & Analytics, Customer Relationship Management (CRM) | Infosys Springboard: Blockchain for Enterprises, etc.
